

## Moose Jaw Saskatchewan Accident Lawyer

Moose Jaw Saskatchewan Accident Lawyer - Our Intellectual Property (IP) Group understands the importance and value of your intellectual property. To assist you license and protect your intellectual property, we offer a broad range of legal assistance connected to trade secrets, trademarks, industrial designs and copyright. Our clients are those involved within the creation, licensing, use, acquisition and protection of intellectual property. Our IP lawyers have many years of skill securing trademark, patent, copyright and industrial design registrations domestically and internationally. We are skilled at enforcing your intellectual property rights.

Our Patent assistance consist of: prosecution, preparation and filing of patent applications; prior art searching; licensing and assignments; enforcement.

For Trademarks, we offer the following: searching and opinions relating to registration of word, design, certification or public official marks and distinguishing guises; preparation and filing of applications for registration; licensing, assignment and franchising agreements; opposition proceedings before the Trade-mark Opposition Board; infringement and passing-off opinions; expungent (removal) applications and renewals; trademark defense and enforcement.

For certain Copyright issues, we offer searching; licensing of literary (including software), dramatic and musical works; prosecution, preparation and filing of applications for registration; infringement opinions; assignment and sale of copyright and copyright protected works; copyright defense and enforcement.

We can assist your company with the protection of Trade Secrets to keep your competitive advantage. We can craft programs and agreements to be able to protect confidential data.

For Industrial Designs we offer searching and availability opinions; licensing and assignment; prosecution, preparation and filing of applications for registration.

Our clients come from various trades like hotels, agriculture, entertainment, technology, travel and manufacturing.
