In order to offer useful legal recommendation regarding numerous complex IT problems, a wide range of scientific expertise and a legal background is needed. Our experts have made the deepest research in these sciences. Some have engineering degrees while others have graduate degrees in the areas of biotechnology, chemistry, physics, engineering physics, electrical engineering and electronics. Amongst our group are members with doctoral degrees in applied chemistry, analytical chemistry, nutrition & metabolism, genetics, plant biogenetics, oncology and telecommunications. Advanced scientific backgrounds along with considerable knowledge at the bench equip our scientific professionals with exceptional expertise and skills.

The Industry

Nowadays, intangible property is the most valuable asset of several businesses and research organizations. Obtaining cost-effective and effective control and protection of intellectual property is essential in a knowledge-driven economy. Cultural industries, technology and telecommunications are important to the nation's economic health and growth. In order to ensure continued economic success, businesses must have a well-developed intellectual property plan.

Gaining access to the rights of others through licensing-in or cross-licensing as their is a trend to protect the results of research prior to public dissemination grows. Flexibility is hence in a position in intellectual property rights to serve the dual purpose of providing an asset used to add revenues through licensing and to secure a niche market. A start-up or research-oriented organization could attain substantial advantages by combining intellectual property assets through cross-licensing with those of a large multinational corporation.

Protecting Intangible Assets

For several businesses in today's competitive conditions, intangible assets such as goodwill, brands and trade secrets are normally at the heart of commercial success. Therefore, protecting intangible assets, that might include a significant portion of their value, is an important approach to business.

Inter-disciplinary Approach

Our inter-disciplinary approach allows us to offer a full range of services. We are well positioned to provide up-to-date and knowledgeable suggestion both to companies in the area of technology and to those affected only incidentally by new technological developments.
